

MAN SIZES

COFRA garments are rugged and durable as well as comfortable. 11 sizes for jackets and 19 for trousers allow you to find the perfect size.

Our sizes comply with the European standards and fit any chest, waist and inside leg sizes.

Selecting the right size of trousers is essential in order to position the knee-pad pocket into the right place and to benefit from the ergonomic cut which ensures ease of movement.

The sizes quoted in the charts refer to the user's measures. Garment sizes, instead, are different from those quoted in the charts because they are wider than body measures and they change according to the wearability of each garment.

POLO SHIRT, T-SHIRT

US - UK - EU SIZE CHART		XS	S	M	L	XL	2XL	3XL	4XL

RIGHT FIT - THE PERFECT SIZE

COFRA has developed the new RIGHT-FIT sizing system, thus making trousers more comfortable to wear. The new RIGHT-FIT system allows to choose SIZES with different leg lengths though maintaining the same waist circumference, and ensures the perfect fitting of trousers to one's own build and the perfect positioning of knee-pad pockets. Moreover, the extension edge allows to further personalize the garment changing its length. For sizing guide to select the correct size of your trousers, see our size chart.

Each colour can have a different shade. Various sizes and batches from different suppliers can be in our stock, for each product and line. Therefore, shipments of the same article having sizes of different colour shades could be arranged.
